PROFILE

Dedicated and highly motivated software developer with hands-on experience in front end development, specializing in React.js, Node.js, and TypeScript. Adept at client interfacing, quality assurance, and delivering high-quality code. Proven ability to collaborate effectively, solve complex problems, and contribute to digital transformation initiatives.

EXPERIENCE

FRONTEND DEVELOPER

Tragle Software Private Limited

Jan 2024 - Present

- Client Interface & Quality Assurance: Collaborated with clients to understand requirements and ensure high customer satisfaction by resolving issues promptly and ensuring quality assurance.
- Design & Architecture: Participated in the creation and review of designs, validating architecture to maintain high service levels.
- Project Estimation & Solution Delivery: Provided inputs for project estimation and solution delivery, conducted technical risk planning, and performed code reviews and unit test plan reviews.
- Team Leadership & Guidance: Led and guided team members towards developing optimized, high-quality code deliverables while adhering to organizational guidelines and processes.
- Digital Transformation: Contributed to building efficient programs/systems, aiding clients in their digital transformation journey.

PROJECTS

E-COMMERCE WEBSITE DEVELOPMENT

- Developed a full-stack e-commerce website using React.js for the front-end and Node.js with Express.js for the back-end.
- Integrated MongoDB for database management and implemented RESTful APIs for seamless data interaction.
